

ACO CABLEMATE®

POLYCRETE® PIT INSTALLATION DRAWING

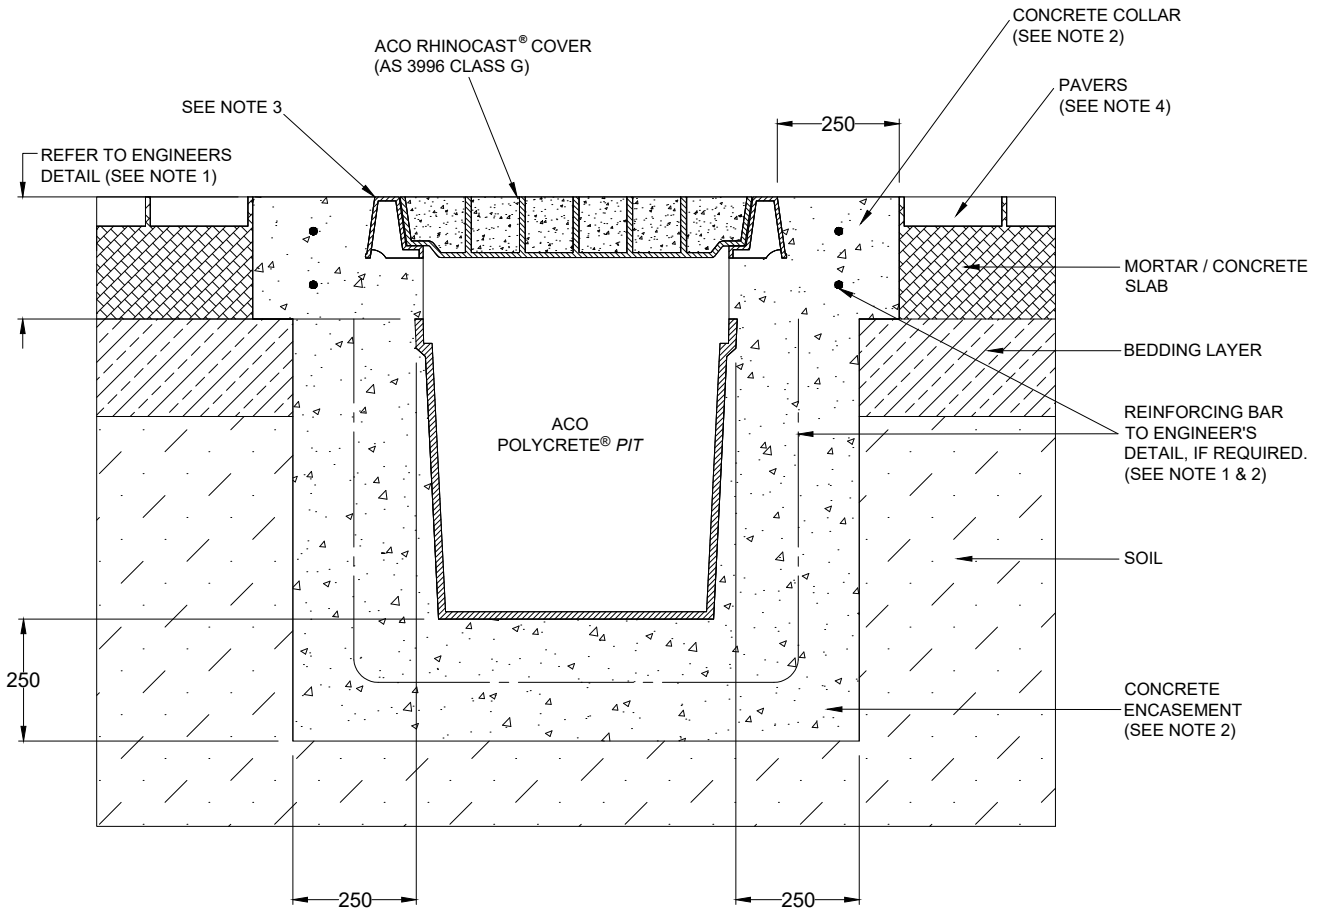

DRWG# XCPR-GP-3

With Rhinocast® Recessed Cover

www.aconz.co.nz

Pavers: For 30000kg Nominal Wheel Load

NOTES:

1. Specific site conditions may require an increase in these dimensions or reinforcement. It is the customer's responsibility to ensure the installation drawing is detailed for the application and the pit structure is protected from undue stress. *Engineering advice may be required.*
2. A minimum concrete strength of 25MPa is recommended. The concrete should be vibrated to eliminate air pockets.
3. The finished level of the concrete collar must be flush with the top of the frame.
4. The paver course adjacent to the concrete collar must be flush with the collar and must be fully bonded to the mortar/concrete slab.
5. Refer to ACO's latest installation instructions for complete details.
